

INDIAN STATISTICAL INSTITUTE

1 Introduction

The Indian Statistical Institute (I.S.I.), founded by Professor Prasanta Chandra Mahalanobis, grew out of the Statistical Laboratory set up by him in the Presidency College in Kolkata. In 1932, the Institute was registered as a non-profit making learned society for the advancement of statistics in India. Within a few years the Institute's achievements in research that included innovative projects on sample surveys of agricultural crops and socio-economic after-effects of the Bengal famine (1943-44) as well as pathbreaking research publications of Professor R.C. Bose on experimental designs in the Annals of Eugenics (1939), brought recognition in India and abroad. The Institute is now considered as one of the foremost centres in the world for training and research in statistics and related sciences. Under the leadership of Professor P. C. Mahalanobis, the Institute also initiated and promoted the interaction of statistics with natural and social sciences to unfold the role of statistics as a key technology which explicated the twin aspects of statistics - its general applicability and its dependence on other disciplines for its own development. In keeping with this long tradition, the Institute has been engaged in developing statistical theory and methods and their practical applications in various branches of science and technology.

The major objectives of the Institute, as given in its Memorandum, are

- (a) to promote the study and dissemination of knowledge of statistics, to develop statistical theory and methods, and their use in research and practical applications generally, with special reference to problems of planning of national development and social welfare;
- (b) to undertake research in various fields of natural and social sciences with a view to the mutual development of statistics and these sciences;
- (c) to provide for, and undertake, the collection of information, investigation, projects and operational research for purposes of planning and the improvement of efficiency of management and production.

The Institute has its headquarters in Kolkata and three major centres at Delhi, Bangalore and Chennai and a branch at Giridih. In addition, the Institute has a network of units of Statistical Quality Control and Operations Research at Baroda, Coimbatore, Hyderabad, Mumbai and Pune.

The Institute has a distinguished faculty, as well as excellent library and modern computer facilities. A large number of Indian statisticians and probabilists who have won international fame have been scholars or faculty members at the Institute. The Institute has in its scientific staff many well-known statisticians, mathematicians, computer scientists, economists and scientists in other fields, among whom are fellows of Indian National Science Academy, Indian Academy of Sciences, Indian National Academy of Engineering, The National Academy of Sciences, India, Institute of Electrical & Electronics Engineers (IEEE), recipients of S.S. Bhatnagar Prize, G.D. Birla Award for Scientific Research, Mahalanobis Memorial medals and fellows of many other distinguished scientific societies in India and abroad.

The Institute has acquired a special distinction in India for its activities since 1950 relating to collection and analysis of information on social, economic and demographic characteristics in India through the National sample surveys. It may be mentioned that in 1954, Pandit Jawaharlal Nehru, the first Prime Minister of India, entrusted Professor Mahalanobis and the Institute with the responsibility of

preparation of the Draft Second Five-Year Plan of the country. This draft and the planning models formulated by the Institute under the guidance of Professor Mahalanobis have since been regarded as major contributions to economic planning in India. During these years eminent economists like Oscar Lange, Joan Robinson, Charles Bettelheim, Jan Tinbergen, Nicholas Kaldor, Simon Kuznets, many of whom were Nobel laureates, visited the Institute and interacted with Professor Mahalanobis. Professors Amartya K. Sen, Sukhamoy Chakravorty and Pitambar Pant, then promising economists, participated in this fruitful interactive process.

The research carried out in the Institute, beginning with the work of Professor P.C. Mahalanobis, Professor R.C. Bose, Professor S.N. Roy and Professor C.R. Rao, has won the Institute a unique place in the world of statistics. Sankhya, the Indian Journal of Statistics, published by the Institute since 1933, carried much of their work in its early issues and has grown into a leading journal in statistics.

Professor P.C. Mahalanobis, while remaining at the helm of affairs as the Honorary Secretary and Director of the Institute till his demise in June 1972, entrusted Professor C. R. Rao to shoulder the crucial responsibility of the Director of the then RTS (Research & Training School) within the Institute. Professor C.R. Rao also discharged the pivotal duties of the Director of the Institute from July 1972 till his retirement and later became the first Jawaharlal Nehru Professor of the Institute and continues to be associated with the Institute.

The Institute has a long tradition of collaborating with eminent statisticians, mathematicians and other scientists from all over the world and having their active participation in its teaching and research programmes. Sir Ronald A. Fisher was a frequent visitor. Professor J.B.S. Haldane joined the Institute in the late fifties and worked in the Institute for several years. Other well-known scientists, some of whom were Nobel Laureates, also visited the Institute. These luminaries included Frederic and Irene Julio Curie, Neils Bohr, Frank Yates, A.N. Kolmogorov, P.M.S. Blackett, Jerzy Neyman, Norbert Wiener, J.D. Bernal and Harold Hotelling.

The Institute has been offering formal courses in statistics leading to certificates and diplomas since the late thirties. Teaching in the Institute took shape in response to the research needs of the Institute from the days of its inception. During 1950s the interdisciplinary nature of teaching in the Institute was evolved through the guidance of stalwarts such as Sir Ronald A. Fisher, Professor P.C. Mahalanobis and Professor J.B.S. Haldane, with the encouragement of Professor Satyendra Nath Bose who was the President of the Institute for a long time. Post-M.Sc. advanced course in statistics was started in the late forties. In 1959, in recognition of the role of statistics as a key technology of the modern times and the importance of the Institute in the development and application of statistics, the Parliament of India enacted the Indian Statistical Institute Act, declaring it an Institution of National Importance and empowering it to grant degrees and diplomas in statistics. The Indian Statistical Institute Act was amended in 1995 empowering it to grant degrees and diplomas in statistics, mathematics, quantitative economics, computer science and such other subjects related to statistics as may be determined by the Institute from time to time. The B.Stat.(Hons.) and the M.Stat. degree programmes in statistics were introduced in the Institute in the year 1960 with the philosophy that the academic training of a statistician should encompass the basic principles of statistics along with its theoretical and methodological development, not merely in abstract formulation, but also in relation to concrete problems arising from natural and social sciences. The curricula for these degree programmes were developed accordingly. The Institute

also introduced research programmes leading to the award of Ph.D. degrees from the Institute. The Diploma in computer science was started in the Institute in 1966 and upgraded to the M.Tech.(CS) degree in 1978. In 1981 the Institute offered the first M.Tech. course in computer science in India.

In the early fifties the Institute initiated the use of Statistical Quality Control and Operations Research (SQC & OR) in India by organizing a visit of Professor W. A. Shewart in 1948 and later by inviting other eminent experts like Dr. W.E. Deming and Dr. Genichi Taguchi. The SQC promotional work gradually began to spread all over the industrial centres in India under a comprehensive programme covering education, theoretical and applied research, practical training in industry and consultation work. The Institute is regarded as the pioneer of the scientific quality control movement in India. It is also credited with introducing in India, the first of its kind, a formal Post Graduate Diploma course in SQC and OR in sixties. This course was upgraded to M.Tech. degree course in Quality, Reliability and Operations Research in 1989. At present, the SQC and OR division of the Institute has a network of SQC and OR units engaged in guiding the industries, located within and outside India, in developing the most up-to-date quality management (ISO 9000, QS 9000, TQM, Six Sigma etc.) systems and solving critical problems of quality, reliability and productivity.

Some of the new degree courses that have been introduced by the Institute in recent years are : (i) Master of Science degree in quantitative economics [M.S.(QE)] (introduced in 1996-97), (ii) Bachelor degree in mathematics (Honours) [B.Math.(Hons.)] (introduced in 2000-01) and (iii) Master degree in mathematics [M.Math.] (introduced in 2003-04). The Institute has been offering a course leading to Associateship in Documentation and Information Science at the Bangalore Centre since 1965-66. This course has now been upgraded to a Master's level course, called the Master of Science in Library and Information Science [M.S.(LIS)].

The International Statistical Education Centre, established in the Institute in 1950, is run by the Indian Statistical Institute under the auspices of the Government of India. This Centre has been providing training in Statistics to sponsored students mainly from Asia, Africa and the Far East. The Centre also offers various short-term courses in statistics and related subjects.

The Institute has a long history of the use of computers and, since the early fifties, has made use of successively newer generation equipments. The Electronic Computer Laboratory of the Institute was established in 1950. The first electronic computer in India, an HEC-2M, was installed in the Institute in 1956, and one of the foremost formal courses for computer science in the country started in the Institute in 1962. In 1961 the Institute, in collaboration with the Jadavpur University, undertook the design, development and fabrication of a fully transistorized digital computer, called ISIJU-1, which was commissioned in 1966. At present, the computing facility in the Institute includes different state of the art computer systems. In addition to PCs with internet connectivity there are high end servers from leading manufacturers like SUN, IBM, DIGITAL, etc. in all the campuses (Kolkata, Delhi, Bangalore) of the Institute. The practical classes of the degree programmes have been designed to make use of computers and software packages.

The Central Library of the Institute is located at Kolkata with a network extending to two major libraries at Delhi and Bangalore Centres and other locations of the Institute. Since the inception of the Institute on 17 December 1931, the Central Library has been playing a pivotal role and over the years, it has attained the distinction of having one of the richest collections in the country particularly in the

fields of statistics and the related disciplines, viz. Computer Science & Electronics, Earth Science, Economics, Life Science, Mathematics and Physics, Quality Control, etc.. At present, the Library has a total volume of more than three lakhs comprising books, bound journals, official reports/data-books, dissertations & theses, reprints, non-print materials such as CDs/floppies, microfilms and microfiches. As the Central Library is fully computerized, it maintains on line access to journals & data bases viz., ACM, CIS, DMJ, EconLit, IEL, INDEST, JSTOR, Mathsci Net, ScienceDirect of Elsevier & Associates and SpringerLink. The library has developed a separate collection known as NBHM collection funded by National Board for Higher Mathematics, Department of Atomic Energy, Govt. of India. The division is making endeavours to create Institutional repositories using open source softwares facilitating access to indigenous resources across regions and increasing the visibility of such resources.

As a part of the Central Library, the renovated 'Amrapali' building which was the residence of the founder of the Institute, now houses P.C. Mahalanobis Memorial Museum & Archives. This was formally inaugurated by Shri P.V. Narasimha Rao, the then Prime Minister of India, on 29th June 1993 on the occasion of birth centenary celebration of Professor Mahalanobis. The museum displays on the life and work of Professor Mahalanobis and the archival collections hold the rare source materials like the official & personal documents, correspondences, scientific and literary papers, photographs etc. of Professor P.C. Mahalanobis & Mrs. Nirmal Kumari Mahalanobis. The documents also include Professor Mahalanobis's interaction with Sir Ronald Fisher, Professor J.B.S. Haldane, Professor W.A. Shewhart, Professor Neils Bohr and other luminaries who stayed at or visited 'Amrapali' on several occasions. Computerized archival record management system is going to be introduced there to meet the research requirements in a more systematic manner. In the recent years the Museum & Archives was visited by eminent personalities like Dr. Abdul J. Kalam, the then President of India, during the 38th convocation of ISI in February, 2004 and Dr. Manmohan Singh, Prime Minister of India on the occasion of inaugural function of Platinum Jubilee of the Institute in December, 2006.

Most of the research and teaching activities of the Institute takes place in three campuses located in Kolkata, Delhi and Bangalore. Each of these three campuses has hostels for students, residential quarters for the faculty and a guest house, and also recreational and medical facilities. At each of these three campuses the Institute has a sizable faculty in theoretical and applied statistics, statistical quality control and operations research, mathematics and economics. In Kolkata, where the headquarters of the Institute is located, there is also a large faculty in Computer and Communication Sciences and other branches of natural and social sciences. The Institute is engaged in significant research activity in many other disciplines, such as, population studies, physics, agricultural & ecological sciences, geology, biological anthropology, human genetics, linguistics, psychometry and sociology. Moreover, in the Bangalore Centre, there are a number of scientists working in Information Science. In all these disciplines, much emphasis is given on inter-disciplinary research and collaborative work with the statisticians of the Institute. The Institute thus conjures up a symbiosis of pure, applied and interdisciplinary research involving various area of statistics, mathematics, quantitative economics, computer science, other natural and social sciences, statistical quality control and managerial decision making. This symbiosis has been systematically reflected in the teaching and training programmes of the Institute.

2 Current Academic Programmes

	Programme	Duration	Venue for 2010-2011
Degree	B. Stat. (Hons.)	3 years	Kolkata
	B. Math. (Hons.)	3 years	Bangalore
	M. Stat.	2 years	Kolkata
	M. Math.	2 years	Kolkata
	M. S. in Quantitative Economics	2 years	Kolkata & Delhi
	M.S. in Library and Information Science	2 years	Bangalore
	M. Tech. in Computer Science	2 years	Kolkata
	M. Tech. in Quality, Reliability and Operations Research	2 years	Kolkata
	Certificate	Part-time Course in SQC*	6 months
Intensive Course in Programming and Application of Electronic Computers*		10 weeks	Kolkata
Fellowship	Junior/Senior Research Fellowship	5 years	Kolkata, Delhi Bangalore, Chennai & Hyderabad
	Specialist Development Programme in SQC & OR (SDP)*	2 years	Bangalore

*For the academic year 2010-2011, these courses will be notified separately, if offered.

The Institute awards Ph.D./D.Sc. degrees for research in the fields of Statistics, Mathematics, Quantitative Economics, Computer Science, and Quality, Reliability & Operations Research (QROR).

The International Statistical Educational Centre (ISEC) of the Institute runs training programmes in collaboration with the Central Statistical Organization (CSO) of Ministry of Statistics and Programme Implementation, Government of India. The Institute also runs a course for ISS Probationers on behalf of the CSO.

	Programme	Duration	Venue
ISEC Courses	Statistical Training Diploma (Regular Courses)	10 months	Kolkata
	Special courses	1 to 12 months	Kolkata
CSO courses	ISS Probationers' Course in Statistical Methodology	10 weeks +	Kolkata and/or Delhi

+ Duration at the Indian Statistical Institute, Kolkata.

3 Stipends, Fellowships, Allowances etc.

Deserving non-sponsored students and research fellows admitted to various programmes receive stipends, fellowships and contingency/book grants as given below, and they are not required to pay any tuition fee.

Programme	Stipend/Fellowship per month (in Rs.)	Contingency/ book grant per year (in Rs.)
B. Stat. (Hons.)/B. Math. (Hons.)	800	1500
M. Stat./M. Math/M.S. in QE/M.S. in LIS	1200	2000
M. Tech. in CS/ M. Tech. in QROR	5000	5000
Junior*/Senior Research Fellowship	12000, 14000/ 14000, 15000+ H.R.A. per rules	20000
SDP in SQC & OR	5600 + H.R.A. as per rules	2500
Research Associateship	16000/17000/18000 +H.R.A. as per rules	20000

* **Junior Research Fellowship:** i) applicants with M.E./M.Tech. or equivalent : Rs. 14000/- per month and ii) for others : Rs. 12,000 per month.

A Special Research Fellowship of Rs. 15000 per month (JRF-level)/ Rs. 18000 per month (SRF-level) is also available for outstanding candidates in each of the following subjects: (i) Statistics, (ii) Mathematics,(iii) Computer Science, (iv) Quantitative Economics and (v) Quality, Reliability & Operations Research.

Stipends are granted in the first instance for one semester/academic year only. They are renewed periodically if the progress of the student is found satisfactory. **Stipend/Fellowship granted to a student may be reduced or completely withdrawn if the academic progress, attendance in class, or character and conduct of the student are not found satisfactory.** Details of the rules pertaining to this are available in the appropriate Students' Brochure [see Section 5]. Students leaving in the middle of a course have to refund the stipend/contingency grant received, if any. At the end of each year/semester, prizes are also awarded for outstanding performance in examinations.

4 Admission Procedure

Admission to the academic programmes is strictly based on the merit of the candidates as judged from their academic records and performance in appropriate selection tests and interviews. The selection tests are held at a number of centres in India. **Section 7** gives details of eligibility conditions and selection tests for the programmes offered. If at any stage of the selection process it is found that a candidate does not satisfy the eligibility conditions, his/her application will not be processed any further. Eligibility requirements may be relaxed in some cases at the discretion of the Institute.

For admission to all the courses (excluding the Fellowship programmes), the Institute follows a policy (the details of which are given at the website (<http://www.isical.ac.in/~deanweb>) in order to ensure reservation for Scheduled Castes (SC), Scheduled Tribes (ST), Other Backward Classes (OBC) and Physically Challenged (PC) categories, as per the policy of the Government of India. The candidates from these reserved categories also enjoy some other benefits in respect of charges, stipend, hostel accommodation and traveling allowance. **SC, ST and OBC candidates will be required to produce the original caste/tribe certificate issued by a competent authority in the prescribed format (given at <http://www.upsc.gov.in/recruitment/scst.htm> & http://www.iitg.ernet.in/jee/OBC_format.htm). These documents must be produced at the time of interview, failing which they will not be considered for admission. For any category of physical disability (viz., locomotor, visual, speech and hearing), benefit will be given to those candidates who have at least 40% permanent physical impairment in relation to a body part / system / extremity / extremities / whole body etc. The candidates in this category will be required to produce a certificate issued by a competent authority (mentioned in <http://nhrc.nic.in/Publications/DisabledRights.pdf>) in the prescribed format (given at <http://upsc.gov.in/recruitment/med-handi.htm>). These documents must be produced at the time of interview, failing which they will not be considered for admission.**

The decisions of the Institute in all these matters are final. Canvassing in any form disqualifies a candidate from being selected. The names of candidates called for interview on the basis of the written tests and also of those selected after interview are generally posted on the internet at the site: <http://www.isical.ac.in/~deanweb>.

If a student fails in a course and is not allowed to repeat, he/she is not eligible for readmission to the same course.

In some programmes there is a provision for employers to sponsor suitable candidates employed by them. Details of this scheme are given separately under the appropriate programmes.

Note : Sample questions and syllabi for the selection tests for the different courses and fellowship programme are sent to the candidates along with admit cards after the applications are processed. Sample questions of last few years for some of the programme are available at the Institute website(<http://www.isical.ac.in/~deanweb>).

5 Students' Brochure

Details of the courses along with the rules and regulations pertaining to the academic programmes of the Institute are given in the Students' Brochure. Usually, each student is supplied with a copy of the current brochure at the time of admission. A periodically updated version of the Students' Brochure is also available on the internet at the site: <http://www.isical.ac.in/~deanweb> in PDF format.

6 Discipline

The students shall observe the normal discipline of the Institute and shall not indulge in cheating in the examinations, rowdiness or any other act of indiscipline or unlawful/unethical/indecent behaviour. There are also specific attendance

requirements that the students are expected to meet, details of which are mentioned in Section 7 under various Course Descriptions. Violations of these are likely to attract punishments such as withholding promotion/award of degree, withdrawing stipend and/or expulsion from the hostel/Institute.

Ragging is banned in the Institute and any one found indulging in ragging will be given punishment such as expulsion from the Institute, or, suspension from the Institute/ classes for a limited period and fine. The punishment may also take the shape of (i) withholding Stipend/Fellowship or other benefits, (ii) withholding results, (iii) suspension or expulsion from hostel and the likes. Further, if any incident of ragging comes to the notice of the authority, the concerned student shall be given liberty to explain, and if his/her explanation is not found to be satisfactory, the authority would expel him/her from the institute. Local laws governing ragging are also applicable to the students of the Institute. Incidents of ragging may be reported to the police.

7 Description of Academic Programmes and Methods of Selection

For all the regular degree courses the following schedule is usually maintained. The Academic Year is divided into two semesters separated by a short break. The first semester (Semester I) for all the courses usually starts in July and ends in December. The second semester (Semester II) starts in January and, for all the courses other than the two M.Tech. courses, it usually ends in May. For the M.Tech.(CS) course, Semester II, which includes summer training, usually ends in June while for the M.Tech.(QROR) course Semester II usually ends in July after the field training.

Classes are held on weekdays (Monday to Friday) during 9:30/10 a.m. to 6 p.m. unless mentioned otherwise.

A brief account of the various courses offered by the Institute is given below. Details regarding the structure of the courses, promotion criteria, etc. can be found in the appropriate Students' Brochure at the site: <http://www.isical.ac.in/~deanweb>.

Note: The Institute reserves the right to make changes in course structure, syllabi, etc. as and when needed.

7.1 Bachelor of Statistics (Honours) [B.Stat.(Hons.)]

7.1.1 Scope

The B.Stat.(Hons.) degree programme offers comprehensive instruction in the theory, methods and application of Statistics, in addition to several areas of Mathematics and some basic areas of Computer Science. It also offers optional courses in some other subjects as given in 7.1.4. It is so designed that on successful completion, the students would be able to pursue higher studies in areas of Statistics and Mathematics, as well as Computer Science, Economics and allied fields, or take up careers as Statisticians in research institutions and scientific laboratories, government departments or industries. The total duration of the B.Stat.(Hons.) programme is **three years**. This programme is offered at Kolkata only.

7.1.2 Eligibility

In order to be eligible for admission, a student should have successfully completed 10+2 years of Higher Secondary Education (or its equivalent) with Mathematics and English as subjects of study. Any student who is asked to discontinue the B.Stat.(Hons.) programme is not eligible for readmission into this programme.

7.1.3 Selection Procedure

Candidates who have successfully cleared the Indian National Mathematical Olympiad (INMO) test, conducted by the National Board for Higher Mathematics, Department of Atomic Energy, Govt. of India, need not sit for the written test; such candidates would be directly called for interview. However, such candidates are required to apply, like all other candidates, in the prescribed application form. All other candidates applying for admission to this programme, have to take written tests comprising objective type and short-answer type questions in Mathematics at the Higher Secondary level (10+2 years' programme). Based on their performances in the tests, a number of candidates are called for Interviews. The final list of candidates selected for admission to the programme is announced after the interviews.

A candidate who has applied to the B. Stat. (Hons.) programme shall have only one option at a subsequent stage to seek admission to the B. Math. (Hons.) programme of the Institute. Candidates desirous of exercising this option must inform the Dean of Studies of their decisions either in writing or by sending an e-mail (dean@isical.ac.in) so as to reach him latest by 24 May, 2010.

7.1.4 Course Structure

The three-year programme consists of a total of thirty courses distributed as five courses per semester. Three of the thirty courses are *Elective* and the rest are *compulsory* courses. In addition, students who are found to lack adequate proficiency in English at the time of admission are required to take and pass a non-credit course in Remedial English in the first semester of the first year. The list of all the credit courses during the six semesters of the programme is given below.

First Year

Semester I : *Statistical Methods I, Probability Theory I, Analysis I, Vectors & Matrices I, Computational Techniques & Programming I, Remedial English (non-credit).*

Semester II : *Statistical Methods II, Probability Theory II, Analysis II, Vectors & Matrices II, Computational Techniques & Programming II .*

Second Year

Semester I : *Statistical Methods III, Probability Theory III, Analysis III, C & Data Structures, Elective Course I.*

Semester II : *Statistical Methods IV, Elements of Algebraic Structures, Economic Statistics & Official Statistics, Demography (half semester) and SQC & OR (half semester), Elective Course II.*

Third Year

Semester I : *Linear Statistical Models, Statistical Inference I, Sample Surveys, Differential Equations, Elective Course III .*

Semester II : *Introduction to Stochastic Processes, Statistical Inference II, Design of Experiments, Statistics Comprehensive, Database Management Systems.*

The Elective Courses are offered in four groups, each group consisting of three courses, as given below. Each student is required to select one of the four groups and take the three courses in that group.

- (i) *Economics I, Economics II and Economics III.*
- (ii) *Economics I, Economics II and Introduction to Sociology.*
- (iii) *Biology I, Biology II and Anthropology & Human Genetics.*
- (iv) *Physics I, Physics II and Geology.*

The passing score in each course (credit or non-credit) is 35%. In order to get promoted from the First Year to the Second Year, a student needs to pass all the courses in the First Year and also secure an aggregate score of at least 45% in the ten credit courses in the First Year. For promotion from the Second Year to the Third Year, the requirement is securing an aggregate score of at least 40% in the ten credit courses in the Second Year in addition to passing all the courses in the Second Year.

A student who fails to get promotion at the end of the First Year or the Second Year is asked to discontinue the programme. On completion of the Third Year and subject to fulfilling the necessary requirements in terms of the academic performance during the three years (the details of which are available in the appropriate Students' Brochure), a student is awarded *either* the B.Stat.(Hons.) degree and placed in the First Division with Distinction or First Division or Second Division, *or* the B.Stat.(Pass) degree. Students who fail in the final year or receive a B.Stat.(Pass) degree are allowed one chance to repeat the Third Year without stipend and contingency grant, provided that in no more than eight courses during the first two years have they secured composite scores of less than 45%.

If the overall attendance of a student falls below a minimum of 75% in any semester, his/her stipend is completely withdrawn in the following semester. A student may also have full/partial stipend cut resulting from poor academic performance and/or unsatisfactory conduct. Details of the current rules in this regard are given in the Students' Brochure for B.Stat. (Hons.).

7.2 Bachelor of Mathematics (Honours) [B.Math.(Hons.)]

7.2.1 Scope

The B.Math.(Hons.) degree programme offers comprehensive instruction in basic mathematics along with rudimentary courses in Probability, Statistics, Computing and Physics. It is so designed that on successful completion, the students would be able to pursue higher studies in the areas of Mathematics, Statistics, Computer Science, Mathematical Physics etc. or take up a career in applications of Mathematics. The total duration of the B.Math.(Hons.) programme is **three years**. This programme is offered at Bangalore Centre only.

7.2.2 Eligibility

In order to be eligible for admission, a student should have successfully completed 10+2 years of Higher Secondary Education (or its equivalent) with Mathematics and English as subjects of study. Any student who is asked to discontinue the B.Math.(Hons.) programme is not eligible for readmission into this programme.

7.2.3 Selection Procedure

Candidates who have successfully cleared the Indian National Mathematical Olympiad (INMO) test, conducted by the National Board for Higher Mathematics, Department of Atomic Energy, Govt. of India, need not sit for the written test; such candidates would be directly called for interview. However, such candidates are required to apply, like all other candidates, in the prescribed application form. All other candidates applying for admission to this programme, have to take written tests comprising objective type and short-answer type questions in Mathematics at the Higher Secondary level (10+2 years' programme). Based on their performances in the tests, a number of candidates are called for Interviews. The final list of candidates selected for admission to the programme is announced after the interviews.

A candidate who has applied to the B. Math. (Hons.) programme shall have only one option at a subsequent stage to seek admission to the B. Stat. (Hons.) programme of the Institute. Candidates desirous of exercising this option must inform the Dean of Studies of their decisions either in writing or by sending an e-mail (dean@isical.ac.in) so as to reach him latest by 24 May, 2010.

7.2.4 Course Structure

The three-year programme consists of a total of thirty courses distributed as five courses per semester. The list of the courses over the six semesters of the programme is given below. In addition, students who are found to lack adequate proficiency in English at the time of admission are required to take and pass a non-credit course in Remedial English in the first semester of the first year.

First Year

Semester I : *Analysis I, Algebra I, Probability Theory I, Physics I, Writing of Mathematics (non-credit).*

Semester II : *Analysis II, Algebra II, Probability Theory II, Physics II .*

Second Year

Semester I : *Analysis III, Algebra III, Statistics I, Physics III, Computer Science I.*

Semester II : *Analysis IV , Algebra IV, Statistics II, Optimization, Computer Science II.*

Third Year

Semester I : *Complex Analysis, Introduction to Differential Geometry, Introduction to Differential Equations, Statistics III, Elective Subject I .*

Semester II : *Combinatorics and Graph Theory, Introduction to Representation Theory, Physics IV, Elective Subject II, Elective Subject III.*

Elective Subjects can be chosen from the following List: *Computer Science III, Computer Science IV, Statistics IV, Statistics V, Probability III, Introduction to Algebraic Geometry, Topology, Introduction to Algebraic Number Theory, Differential Geometry II, Introduction to Differential Topology, Mathematics of Computation, Introduction to Dynamical Systems.*

A review of the course structure is being planned and if there are any changes it will be notified in the website.

The passing score in each course (credit or non-credit) is 35%. In order to get promoted from the First Year to the Second Year, a student needs to pass all the courses in the First Year and also secure an aggregate score of at least 45% in the ten credit courses in the First Year. For promotion from the Second Year to the Third Year, the requirement is securing an aggregate score of at least 40% in the ten credit courses in the Second Year in addition to passing all the courses in the Second Year. **A student who fails to get promotion at the end of the First Year or the Second Year is asked to discontinue the programme.** On completion of the Third Year and subject to fulfilling the necessary requirements in terms of the academic performance during the three years (the details of which are available in the appropriate Students' Brochure), a student is awarded *either* the B.Math.(Hons.) degree and placed in the First Division with Distinction or First Division or Second Division, *or* the B.Math.(Pass) degree. Students who fail in the final year or receive a B.Math.(Pass) degree are allowed one chance to repeat the Third Year without stipend and contingency grant, provided that in no more than eight courses during the first two years they have secured composite scores of less than 45%.

If the overall attendance of a student falls below a minimum of 75% in any semester, his/her stipend is completely withdrawn in the following semester. A student may also have full/partial stipend cut resulting from poor academic performance and/or unsatisfactory conduct. Details of the current rules in this regard are given in the Students' Brochure for B.Math.(Hons.).

7.3 Master of Statistics [M.Stat.]

7.3.1 Scope

The M.Stat. programme offers advanced level training in the theory, methods and applications of Statistics along with specialized training in selected areas of Statistics and allied fields. Depending on the area of specialization, students would be able to pursue an academic/research career in Statistics, Mathematics, Economics, Computer Science and allied fields. They would also be able to work competently as Statisticians and specialists in research institutions and scientific laboratories, government departments or industries. The total duration of the M.Stat. programme is **two years**. This programme is being offered this year at Kolkata only.

7.3.2 Eligibility

In order to be eligible for admission to the M.Stat. programme, a student must have a 3- year Bachelor's degree with Statistics as full subject, or have a B.Stat./B.Math. degree from the Indian Statistical Institute or a Statistician's Diploma/Senior Diploma in Statistics from the Indian Statistical Institute . Any student who was asked to discontinue the M.Stat. programme is not eligible for readmission into this programme.

7.3.3 Selection Procedure

Students with B.Stat.(Hons.) degree from the Indian Statistical Institute are offered direct admission to the M.Stat. programme without any selection test and interview. For other eligible candidates, including students with B.Stat.(Pass) degree from the Indian Statistical Institute, selection for admission to the M.Stat. programme is based

on academic record, performance in written selection tests and subsequent interview. If a candidate holds a Statistician's Diploma/Senior Diploma in Statistics from the Indian Statistical Institute and is selected for admission, he/she may be considered for admission to the Second Year of the programme.

The written selection tests consist of :

- (a) a test comprising objective and/or short-answer questions in Mathematics at Bachelor's degree level, and
- (b) a test comprising objective and/or short-answer questions in Statistics and Mathematics at a three-year Bachelor's degree level, designed to assess competence in the theory and methods of Statistics and comprehension in Mathematics.

7.3.4 Course Structure

The M.Stat. programme is offered in two different streams, namely, B-stream and NB-stream. The students of this programme need to do either a two-year *Applications* specialization* or one of the following specializations in the second year:

Advanced Probability (AP)

Actuarial Statistics (AS)

Applied Statistics and Data Analysis (ASDA)

Biostatistics and Data Analysis (BSDA)

Industrial Statistics and Operations Research (ISOR)

Mathematical Statistics and Probability (MSP)

Quantitative Economics (QE)

A student, who does not do *Applications* specialization*, must follow the usual first year curriculum in his/her stream, as given below. A student with B.Stat. (Hons.) degree from the Institute is put in the B-stream and he/she has to choose between the usual first year curricula for the B-stream and the *Applications* specialization*. **A student, who joins the programme by qualifying in the entrance test, is placed in NB-stream or B-stream with usual respective first year curricula or *Applications* specialization* by the Selection Committee.**

Offering a specialization in a particular centre is subject to the interest of the students and the availability of the adequate resources. The Dean of Studies will inform the students in advance about the availability of the specializations and the respective centres. **Not all specializations may be offered at all the centres. However, *Applications* Specialization*, if offered, is held at Delhi Centre only. Further, the first year programme for B- stream and NB- stream is held at Kolkata only.**

In case a particular specialization is not offered at a centre, a student of that centre opting for that specialization may be asked to study at a different centre where such specialization is offered. Each specialization has a number of prerequisites in terms of specific courses. The selection of students for various specializations in the second year will depend on students' preferences, their academic background as well as their performance in the First Year. The final selection of students for various specializations in the second year is determined by the Dean of Studies in consultation with the Teachers' Committee.

* This specialization is not being offered this year.

First Year

The curriculum for the First Year consists of ten courses for each of B-stream, NB-stream, and Applications Specialization, as listed below. In addition, each student has also to take a course in Official Statistics offered at the end of the First Year.

B-stream:

Semester I : *Large Sample Statistical Methods, Measure Theoretic Probability, Sample Surveys & Design of Experiments, Applied Stochastic Processes, Statistical Inference I .*

Semester II : *Regression Techniques, Multivariate Analysis, Metric Topology & Complex Analysis, Elective I, Elective II .*

NB-stream:

Semester I : *Linear Models & Markov Chain, Real Analysis, Large Sample Statistical Methods, Sample Surveys & Design of Experiments, Statistical Inference I .*

Semester II : *Regression Techniques, Multivariate Analysis, Programming & Data Structures, Elective I, Elective II .*

Elective Courses: *Time Series Analysis, Discrete Mathematics, Optimization Techniques, Measure Theoretic Probability, Metric Topology & Complex Analysis, Nonparametric and Sequential Analysis (the last three are available only to NB-Stream students).*

Applications Specialization* :

Semester I : *Analysis I, Probability and Stochastic Processes I, Methods of Statistical Inference I, Linear Algebra, Elements of Sample Surveys and Design of Experiments.*

Semester II : *Probability and Stochastic Processes II, Linear Models and GLM, Statistical Inference II, Multivariate Analysis, Regression Techniques.*

A student is promoted from the First Year to the Second Year of the M.Stat. programme provided, in the First Year, his/her attendance and conduct are satisfactory and his/her composite score in no course is less than 35% and the average composite score in all the courses taken together is not less than 45%.

Students who fail to get promoted are asked to discontinue the programme.

Second Year

Each student in the Second Year has to take a total of ten courses (five in each semester), which will include all the Compulsory Courses for his/her specialization and a certain number (as required by the specialization) of courses from the Lists of Elective Courses (details of which are available in the Students' Brochure for M.Stat.) for his/her specialization. The remaining elective courses, if any, can be selected from any other course offered in the second year of the M.Stat. programme at that centre.

The compulsory courses for the **Applications Specialization*** in the second year are as follows.

Semester I : *Analysis II, Statistical Computing, Time Series Analysis.*

Semester II : *Probability and Stochastic Processes III , Project.*

* This specialization is not being offered this year.

The compulsory courses for all other specializations offered in the second year are listed below.

(a) Advanced Probability (AP) : *Advanced Probability I, Functional Analysis, Stochastic Processes I, Stochastic Processes II.*

(b) Actuarial Statistics (AS) : *Actuarial Methods, Life Contingencies, Actuarial Models, Survival Analysis.*

(c) Applied Statistics & Data Analysis (ASDA) : *Advanced Design of Experiments, Analysis of Discrete Data, Statistical Computing, Advanced Sample Surveys, Applied Multivariate Analysis.*

(d) Bio-Statistics & Data Analysis (BSDA) : *Statistical Methods in Genetics I, Analysis of Discrete Data, Statistical Computing, Survival Analysis, Statistical Methods in Public Health, Statistical Methods in Biomedical Research.*

(e) Industrial Statistics & Operations Research (ISOR) : *Advanced Design of Experiments, Life Testing and Reliability, Quality Control and Its Management, Management Applications of Optimization, Industrial Applications of Stochastic Processes, Optimization Techniques II.*

(f) Mathematical Statistics & Probability (MSP) : *Advanced Probability I, Functional Analysis, Stochastic Processes I, Statistical Inference II.*

(g) Quantitative Economics (QE) : *Microeconomics I, Game Theory I, Econometric Methods, Macroeconomics I.*

On completion of the Second Year and subject to fulfilling the necessary requirements in terms of academic performance during the two years (the details of which are available in the appropriate Students' Brochure), a student is awarded the M.Stat. degree and placed *either* in the First Division with Distinction *or* in the First Division *or* in the Second Division. Students who fail in the final year are allowed one chance to repeat the Second Year without stipend and contingency grant, provided that his/her average composite score in the Second Year is not less than 35% and that his/her conduct is satisfactory.

If the overall attendance of a student falls below a minimum of 75% in any semester, his/her stipend is completely withdrawn in the following semester. A student may also have full/partial stipend cut resulting from poor academic performance and/or unsatisfactory conduct. Details of the current rules in this regard are given in the Students' Brochure for M.Stat.

7.4 Master of Mathematics [M.Math.]

7.4.1 Scope

The M. Math. programme offers advanced level training in Mathematics. On successful completion of the course, students would be able to pursue a research/academic career in Mathematics. Depending on the choice of the optional subjects, the students would also be able to work in the fields of Probability Theory and Theoretical Computer Science. The total duration of the M.Math. programme is **two years**. This programme is being offered this year at Kolkata only.

7.4.2 Eligibility

In order to be eligible for admission to the M.Math. programme, a student must *either* have a three-year Bachelor's degree or a B. E./B. Tech. Degree, with Mathematics and **an exceptionally strong background in Analysis and Abstract Algebra** or have a B. Stat. /B. Math. degree of the Indian Statistical Institute. Any student who is asked to discontinue the M.Math. programme is not eligible for readmission into this programme.

7.4.3 Selection Procedure

Students with B.Math.(Hons.) degree from the Indian Statistical Institute are offered direct admission to the M.Math. programme without any selection test and interview. For other eligible candidates, including students with B.Math.(Pass) degree from the Indian Statistical Institute, selection for admission to the M.Math. programme is based on academic record, performance in written selection tests and subsequent interview.

The selection tests will comprise objective and/or short-answer type questions in Mathematics at a level corresponding roughly to the Mathematics Honours/Mathematics Major of Indian universities, with special emphasis on Real Analysis, Linear and Abstract Algebra.

7.4.4 Course Structure

The programme will be conducted over four semesters. A student will have to take five courses in each semester.

Compulsory Courses: *Analysis of Several Variables, Measure Theory, Algebra I, Topology I, Linear Algebra, Complex Analysis, Functional Analysis, Algebra II, Topology II, Differential Geometry I, Differential Topology, Fourier Analysis, and Probability Theory (only for non-B.Stat. and non-B.Math. students).*

Elective Courses: *Differential Equations (only for non-B.Stat. and non-B.Math. students), Graph Theory and Combinatorics, Number Theory, Commutative Algebra I, Differential Geometry II, Topology III, Partial Differential Equations, Advanced Probability, Algebra III, Representations of Locally Compact Groups, Commutative Algebra II, Advanced Number Theory, Algebraic Geometry, Algebraic Number Theory, Markov Chains, Ergodic Theory, Topology II, Advanced Functional Analysis, Operator Theory, Set Theory, Mathematical Logic, Advanced Linear Algebra, Lie Groups and Lie Algebras, Linear Algebraic Groups, Elliptic Curves, Stochastic Processes, Game Theory, Automata Languages and Computation, Advanced Fluid Dynamics, Quantum Mechanics I, Quantum Mechanics II, Analytical Mechanics, Project I, Project II and Special Topics.*

Offering an elective course will depend on students' interest and availability of teachers. The details of sequencing of the courses over the four semesters and the specific prerequisites for different courses are available in the appropriate Students' Brochure.

A student is promoted from the First Year to the Second Year of the M.Math. Programme provided, in the First Year, his/her attendance and conduct are satisfactory and his/her composite score in no course is less than 35% and the average composite score in all the courses taken together is not less than 45%.

Students who fail to get promoted are asked to discontinue the programme. On completion of the Second Year and subject to fulfilling the necessary requirements in terms of academic performance during the two years (the details of which are available in the appropriate Students' Brochure), a student is awarded the M.Math. degree and placed *either* in the First Division with Distinction *or* in the First Division *or* in the Second Division. Students who fail in the final year are allowed one chance to repeat the Second Year without stipend and contingency grant, provided that his/her average composite score in the Second Year is not less than 35% and that his/her conduct is satisfactory.

If the overall attendance of a student falls below a minimum of 75% in any semester, his/her stipend is completely withdrawn in the following semester. A student may also have full/partial stipend cut resulting from poor academic performance and/or unsatisfactory conduct. Details of the current rules in this regard are given in the Students' Brochure for M.Math.

7.5 Master of Science in Quantitative Economics [M.S.(Q.E.)]

7.5.1 Scope

This is an advanced course in Economics and its applications with special emphasis on quantitative methods. On completion of the course, the students would be able to pursue an academic career in Economics or take up responsible positions in various private and public sector organizations. The total duration of the M.S.(Q.E.) programme is **two years**. This programme is offered at Kolkata and Delhi.

7.5.2 Eligibility

In order to be eligible for admission to the M.S. (Q.E.) programme, a student must have a three-year Bachelor's degree in Economics / Mathematics / Statistics / Physics or a B.Stat. degree from the Indian Statistical Institute. Engineering graduates are also eligible to apply. Candidates should have knowledge of Economics and Mathematics at B.A./ B.Sc. pass level. Any student who is asked to discontinue the M.S.(QE) programme is not eligible for readmission into this programme.

7.5.3 Selection Procedure

Selection of candidates to the M.S.(Q.E.) programme will be based on academic record and performance in written tests and interview. The selection tests will comprise objective and/or short-answer questions in **both Economics and Mathematics at the Bachelor's degree level**.

7.5.4 Course Structure

There will be 8 compulsory courses and 12 elective courses. The compulsory courses, along with their sequencing over the semesters are as follows:

First Year

Semester I : *Microeconomic Theory I, Game Theory I, Statistics, Mathematical Methods and one Elective Course.*

Semester II : *Microeconomic Theory II, Macroeconomic Theory I, Econometric Methods I and two Elective Courses.*

Second Year

Semester I : *Macroeconomic Theory II and any four from the list of Elective Courses.*

Semester II : *Any five from the list of Elective Courses.*

List of Elective Courses

Computer Programming and Applications, Econometric Methods II, Econometric Applications I, Econometric Applications II, Time Series Analysis and Forecasting, Sample Surveys : Theory and Practice, Bayesian Econometrics, Mathematical Programming with Applications to Economics, Game Theory II, Economic Development I, Economic Development II, Intertemporal Economics, Modern Growth Theory, Industrial Organization, Theory of Planning, Social Accounting, Agricultural Economics, Public Economics, Regional Economics, International Economics I, International Economics II, Advanced Topics in International Economics, Monetary Economics, History of Economic Thought, Social Choice and Political Economy, Incentives and Organizations, Privatization and Regulations, Environmental Economics, Theory of Finance I, Theory of Finance II, Theory of Finance III, Political Economy and Comparative Systems, Selected Topics I, Selected Topics II .

Offering an elective course will depend on students' interest and availability of teachers. A student is promoted from the First Year to the Second Year of the M.S.(Q.E.) Programme provided, in the First Year, his/her attendance and conduct is satisfactory and his/her composite score in no course is less than 35% and the average composite score in all the courses taken together is not less than 45%.

Students who fail to get promoted are asked to discontinue the programme. On completion of the Second Year and subject to fulfilling the necessary requirements in terms of the academic performance during the two years (the details of which are available in the appropriate Students' Brochure), a student is awarded the M.S.(Q.E.) degree and placed *either* in the First Division with Distinction *or* in the First Division *or* in the Second Division. Students who fail in the final year are allowed one chance to repeat the Second Year without stipend and contingency grant, provided that his/her average composite score in the Second Year is not less than 35% and that his/her conduct is satisfactory.

If the overall attendance of a student falls below a minimum of 75% in any semester, his/her stipend is completely withdrawn in the following semester. A student may also have full/partial stipend cut resulting from poor academic performance and/or unsatisfactory conduct. Details of the current rules in this regard are given in the Students' Brochure for M.S.(Q.E.).

7.6. Master of Science in Library and Information Science [M.S.(LIS)]

7.6.1 Scope

This is an advanced programme in Library and Information Science with special emphasis on applications of Information technology. On completion of the programme, the students will be able to pursue an academic career or take up responsible positions in various private and public sector organizations in Library and Information field. The objectives of the course are to develop manpower capable of :

- Effectively and efficiently working as information professionals at higher levels in libraries and information centres.
- Design & development of information systems.
- Contributing to the discipline of Library and Information science in terms of research and teaching.

The total duration of this programme is **two years**, and it is offered at Bangalore only.

7.6.2 Eligibility

The minimum qualification for admission to the M.S. in Library and Information Science programme is a three-year Bachelor's degree in any discipline. **The candidates must have secured at least 60% marks in the Bachelors' degree.**

7.6.3 Selection Procedure

Selection of candidates will be based on academic records and performance in written tests and interview.

7.6.4 Course Structure

The two-year programme consists of a total of twenty credit-courses distributed over four semesters. These include colloquium, seminar and dissertation work. In addition, there are two courses in Elementary Mathematics (each carrying four credits) in the first and second semesters. However, for those who have not studied mathematics at the plus two level, these two courses are credit-courses.

The dissertation work on an approved topic will be spread over the 3rd and 4th semesters. Evaluation of dissertation will be based on a) the contribution by the student (original contribution or some developmental work), b) report itself, c) presentation in an open seminar (defense), and d) depth of knowledge in the area.

The courses along with their sequencing over the semesters are as follows:

Semester I: Foundations of Library and Information Science; Information Organization (Theory and Practice); Cataloging and Metadata (Theory and Practice); Foundations of Computer & Information Technology; Library Management & Library Automation (4 credits each) and Elements of Mathematics-I (credit or non-credit).

Semester II: Information Sources, Systems and Services; Elements of Statistics and Research Methodology; Digital Libraries; Data Structures and Programming; Colloquium (4 credits each) and Elements of Mathematics-II (credit or non-credit).

Semester III: Information Storage, Retrieval and DBMS; Content Management Systems (CMS); Informetrics and Scientometrics; Web Technologies and Web-based Information Services; Seminar (4 credits each) and Dissertation.

Semester IV: Networking Technologies and Library Networks; Knowledge Management Systems; Semantic Web; Elective (4 credits each) and Dissertation (8 credits)

Electives : One of the following subjects has to be chosen by a student as an *elective*. Business & Corporate Information Systems; Health Information Systems; Agricultural Information Systems, Social Science Information Systems; TQM; Data & Text Mining, etc.

The programme may also include any other advanced level course as recommended by the Teachers' Committee and approved by the Academic Council.

There will be four semesters in this programme. Evaluation of candidates in each semester will be based on their performance in the examinations / seminars / colloquia as applicable to a particular course in that semester.

Minima for Passing a Course: A student has to secure at least 35% marks in each course (credit or non-credit) to pass that course. Any student, who fails to secure 35% marks in a paper, will be allowed one more chance to appear for an examination (as a back paper examination) in that course. However, a student will be allowed to take at most two back paper examinations in a semester.

A student is promoted from one semester to the next if i) his/her attendance and conduct during the semester are satisfactory, and ii) his/her score in no course is less than 35%, and iii) the average composite score in all the courses taken together is not less than 45%. **A student, who fails to get promoted in Semester 1 or Semester 2, has to discontinue the programme.** However, a student who fails in Semester 3 or Semester 4, will be given one more chance to repeat the corresponding semester without any stipend. At the end of the fourth semester, all successful candidates will be awarded the degree of Master of Science (Library & Information Science) [M.S. (Library & Information science)] of the Indian Statistical Institute. The classification of all successful candidates will be done as follows:

- Candidates securing 75% or more marks in the aggregate will be declared to have passed in *first class with distinction, provided he/she passed in all the papers in the first attempt.*
- Candidates securing 60% or more, but less than 75% marks in the aggregate taking into consideration all the courses will be declared to have passed in *first class.*
- Candidates securing 45% or more, but less than 60% marks in the aggregate taking into consideration all the courses will be declared to have passed in *second class.*

If a student fails in Semester 3 or Semester 4, his/her stipend and contingent grant will be completely withdrawn when he/she repeats that semester next time. Also, partial stipends may be given to a student at the discretion of the Teachers' Committee, if a student's conduct/attendance is not satisfactory.

7.7 Master of Technology in Computer Science [M. Tech. (CS)]

7.7.1 Scope

The Master of Technology in Computer Science programme is offered in Kolkata. The programme is designed to provide a balanced mixture of theoretical and professional training in Computer Science and Technology so that the students, on successful completion of the programme, may take up either (a) a professional career in the technology of software for computer systems or specialized application areas, or (b) an academic career for further study and research in the fundamental and applied aspects of Computer Science and Technology and related disciplines. This programme is offered at Kolkata only.

7.7.2 Eligibility

A candidate seeking admission to this programme should possess one of the following minimum academic qualifications : (i) a Master's degree in Mathematics/ Statistics/ Physics/ Electronic Sciences/ Computer Science/ Computer

Applications/Information Technology or, (ii) a Bachelor's degree in Engineering/Technology or any other qualification considered equivalent (such as AMIE or, GRAD-IETE or, DOEACC 'B' Level). Any student who is asked to discontinue the M.Tech.(CS) programme is not eligible for readmission into this programme.

7.7.3 Selection Procedure

A candidate with a valid GATE score above a threshold (to be decided by the Selection Committee) in his/her own subject would be directly called for interview. Final selection of such candidates would be based on their academic records and their performance in the interview. These candidates are required to apply, like all other candidates, in the prescribed application form. All other candidates are admitted through written tests and an interview. A few candidates may be sponsored by government, semi government, public sector undertakings and autonomous institutions but such candidates will also be admitted through the selection test; the Institute at its discretion may apply a different criterion for such candidates. A candidate would be considered sponsored only if he/she is given leave and full salary by the employer for the full duration of the course. Sponsored candidates will not receive any stipend and their sponsors will have to pay a tuition fee of Rs. 20,000/- per year.

The selection test will consist of two parts:

(a) an objective and/or short-answer type test in Mathematics at the B.Sc. (Pass) level ;

(b) an objective and/or short-answer type test comprising the following :

Group A : A test for all candidates in Mathematics at the B.Sc.(Pass) level and logical reasoning.

Group B : A test, divided into five sections carrying equal marks, in Mathematics, Statistics and Physics at the M.Sc. level and in Computer Science, Engineering and Technology at the B.Tech. level. A student has to answer questions from one of these sections only.

7.7.4 Course Structure

The duration of the M.Tech. (CS) programme is two years which is divided into four semesters. A student is required to take six courses in each semester, making up a total of twenty-four courses, of which two are accounted for by the dissertation work to be done during the third and fourth semesters. In addition, a student has to undergo, after successful completion of course work in the first and second semesters, a compulsory practical training of about eight weeks in a research institute or a public/private sector organization under the guidance of an assigned supervisor in that institute/organization.

Further, a student may take extra non-credit courses, at most one per semester, either on recommendation of the faculty or out of his/her own interest.

The courses of study in various semesters are as follows.

First Year

Semester I

Programming Languages and Methodology, Discrete Mathematics, Data and File Structures and three courses from the List A of courses, as advised by the faculty depending on the background of the student.

List A : *Switching Circuits and Logic Design, Computer Organization, Assembly Language and Systems Programming, Optimization Techniques, Elements of Algebraic Structures, Probability and Stochastic Processes, Numerical Analysis.*

Semester II

Computer Networks, Design and Analysis of Algorithms, Automata Languages and Computation, Computer Architecture, Operating Systems, Software Engineering.

Second Year

Semester III

Data Base Management Systems, Internet and Multimedia Technologies, Compiler Construction and two courses from the List B of courses, as advised by the faculty depending on the background of the student, and Dissertation (to be continued through the fourth semester).

List B : *Pattern Recognition and Image Processing, Digital Signal Processing, Cryptology, Advanced Algorithms for Graph and Combinatorial Optimization Problems, Artificial Intelligence, VLSI Design and Algorithms, Computer Graphics, Parallel Processing : Architectures and Algorithms, Advanced Operating Systems.*

Semester IV

Five electives to be selected from the List C of courses given below and Dissertation (continued from the third semester).

List C : *Formal Aspects of Programming Languages and Methodology, Computational Complexity, Topics in Algorithms and Complexity, Logic for Computer Science, Formal Methods in Computer Science - Selected Topics, Logic Programming and Deductive Databases, Topics in Algebraic Computation, Lambda Calculus Combinators and Functional Programming, Information and Coding Theory, Advanced Cryptology, Multi-dimensional Search and Computational Geometry, Real-Time Systems, Fault-tolerant Computing, Data Mining and Knowledge Discovery, Advanced Database Theory and Applications, Advanced Pattern Recognition, Advanced Image Processing, Computer Vision, Robotics, Analysis of Remote Sensing Images, Fuzzy Logic and Applications, Neural Networks and Applications, Advanced Web Technologies/Advanced Internet Programming, Document Processing and Retrieval, Selected Topics on the Recent Development in Computer Science (as suggested by the faculty).*

The Teachers' Committee determines the subjects to be offered in any particular semester.

Dissertation: A student is required to work toward a dissertation on a topic assigned/approved by the teachers' committee under the supervision of a suitable ISI faculty member. The work for a dissertation should be substantial and relate to some important problem in an area of computer science and/or its applications and should have substantial theoretical or practical significance. A critical review of recent advances in an area of computer science and/or its applications with some contribution by the student is also acceptable as a dissertation.

The work should commence at the beginning of the third semester and be completed along with the courses of the fourth semester. The dissertation should be submitted by the middle of July of the year of completion. The dissertation will be evaluated by a committee consisting of the faculty members, the supervisor and external expert(s). The student has to defend his/her dissertation in an open seminar. The dissertation is considered to be equivalent to two credit courses.

The final result of a student is decided on the basis of his/her performance in all the courses, summer training and dissertation. A student admitted to the first year of the programme is allowed to attend the second semester of the programme if he/she passes the first semestral examinations; otherwise he/she has to discontinue the programme. A student who takes all the second semestral examinations will be allowed to go for summer training, otherwise, he/she has to discontinue the programme. A student who passes the second semestral examination and completes the summer training satisfactorily (certified by the guide) is promoted to the third semester of the programme, otherwise, he/she has to discontinue the programme. A student promoted to the third semester of the programme will be allowed to attend the fourth semester of the programme if he/she passes the third semestral examinations. A student who successfully defends his/her dissertation and project report within the prescribed time limit and passes the fourth semestral examinations will be declared to have completed the fourth semester of the programme. If a student fails in a course in any semester, he/she will be allowed to take a backpaper examination. At most one backpaper examination is allowed in a given subject. A student can take a maximum of 2(two) backpaper examinations in the first year and a maximum of 2(two) in the second year. However, there will be no backpaper examination for the Dissertation.

A student passing the M.Tech.(CS) is placed in the First Division with Honours, First Division or Second Division depending on his/her performance.

Details of all relevant aspects of this programme are given in the Students' Brochure for M.Tech. (CS).

7.8 Master of Technology in Quality, Reliability and Operations Research [M. Tech. (QROR)]

7.8.1 Scope

The Master of Technology in Quality, Reliability and Operations Research is a two-year full time programme and is offered at Kolkata only. This programme is intended to develop specialists in Quality Management with emphasis on Statistical Quality Control, Reliability, Operations Research, Computer Engineering and Management Systems. The objective is to equip students with the necessary skills together with sufficient theory to understand the principles involved in applications and to develop in them the power of systematic thinking and reasoning and methodical approach to solving live industry problems of quality, reliability and productivity. Besides undergoing classroom instructions, every student shall do a dissertation and a project work on live problems of industry directly under the guidance of the faculty of ISI.

In-depth exposure to the techniques of Statistics, Operations Research, Reliability, Quality Management, Financial Management, Software Engineering, etc., as a part of the curriculum, would enable the students to acquire knowledge and skills needed for implementing the most modern quality assurance systems (like ISO 9000, QS 9000, etc.), quality management systems (like TQM, Six Sigma, etc.) and environmental management system (ISO 14000) in any organization and solving critical quality, reliability and optimization problems related to products, process and service. On successful completion of this programme, the students may take up either (a) a professional career in the field of quality, engineering and management, or (b) an academic career for further study and research in theoretical and applied aspects of Quality, Reliability and Operations Research.

7.8.2 Eligibility

A candidate seeking admission to this course should

- (i) ordinarily have completed 21 years of age (relaxable in special cases);
- (ii) be conversant with the following topics : Mathematics (at the graduate level) and knowledge of Physics and Chemistry (at the higher secondary level);
- (iii) possess any of the following minimum qualifications:
 - a. Master's Degree in Statistics.
 - b. Master's Degree in Mathematics with Probability and Statistics as major subjects.
 - c. Bachelor's Degree in Engineering or Technology or any other qualification considered equivalent.
 - d. Post-Graduate Diploma in SQC & OR from the Indian Statistical Institute.

Any student who is asked to discontinue the M. Tech. (QROR) programme is not eligible for readmission into this programme.

The programme is offered in two streams:

Statistics Stream for candidates with qualifications as in a, b, or d, of (iii) above;

Engineering Stream for candidates with Bachelor's / equivalent degree in Engineering or Technology as in c of (iii) above.

7.8.3 Selection Procedure

All candidates, including sponsored ones, are admitted through a selection test. For admission to this course, valid GATE score is not necessary, and the candidates with valid GATE scores, are also admitted through the selection test. There is, however, a provision for sponsorship by government, semi-government, public sector undertakings, autonomous institutions and industrial organisations. Organisations can sponsor candidates from their establishments for this programme provided they satisfy the eligibility requirements. The Institute, at its discretion, may apply a different criterion for such candidates. A candidate would be considered sponsored only if the employer, for the entire duration of the programme, gives him/her leave and full salary. Sponsored candidates will not receive any stipend and their sponsors will have to pay a tuition fee of Rs. 20,000/- per year.

The selection test will consist of two parts:

- (a) an objective and/or short-answer type test in Mathematics at the B.Sc. (Pass) level;
- (b) an objective and/or short-answer type test for the two streams as follows:

Part I (for Statistics Stream): A test divided into two sections carrying equal marks, in Statistics and Probability. A student has to answer questions from both the sections.

Part II (for Engineering Stream): A test divided into several sections: Mathematics, Engineering Mechanics, Electrical & Electronics Engineering, Thermodynamics, Engineering Properties of Metals, Engineering Drawing etc.

A student has to answer questions from Mathematics section compulsorily and the remaining questions from two or more sections of his/her choice.

7.8.4 Course Structure

The M.Tech.(QROR), programme is conducted over four semesters, two semesters each in the first and second years. The following courses are offered in the first year.

- (a) **For the Statistics Stream:** (i) *Electrical and Electronics Engineering*, (ii) *SQC-I & II*, (iii) *Operations Research-I*, (iv) *Programming Techniques and Data Structures*, (v) *Quality Management and Systems*, (vi) *Workshop I & II*, (vii) *Mechanical Engineering*, (viii) *Instrumentation and Computer Engineering*, (ix) *Industrial Engineering and Management*, (x) *Reliability-I*.
- (b) **For the Engineering Stream:** (i) *Probability - I & II*, (ii) *Statistical Methods - I & II*, (iii) *SQC - I & II*, (iv) *Operations Research - I*, (v) *Programming Techniques and Data Structures*, (vi) *Quality Management and Systems*, (vii) *Instrumentation and Computer Engineering*, (viii) *Industrial Engineering and Management*, (ix) *Reliability - I*.

The following courses are offered during the second year for both the streams: (i) *Operations Research – II*, (ii) *Industrial Experimentation*, (iii) *Reliability – II*, and three elective subjects selected from a broad range of subjects like *Applied Stochastic Processes*, *Advanced Statistical Methods*, *Advanced Optimization Techniques*, *Software Engineering*, *Database Management Systems*, *Advanced Reliability*, *Game Theory and Decision Theory*, or other selected subjects as suggested by the faculty.

However, from the above list of elective subjects, the Teachers' Committee will decide on the subjects to be offered to the students and also the combination a student may take up.

In addition, at the end of the first year, the students have to undertake project studies (Project - I) in industries. During the fourth semester of the second year, they have to work on dissertation at the Institute and also have to undertake the second phase of project work (Project – II) in industries.

Every student is expected to attend all the classes. If he/she is absent, he/she must apply for leave to Dean of Studies or Academic Coordinator. Failing to do so may result on disciplinary action.

The final result of a student is decided on the basis of his/her performance in all the courses, project studies and dissertation. A student admitted to the first year of the programme is allowed to attend the second semester of the programme if he/she passes the first semestral examinations; otherwise he/she has to discontinue the programme. A student who takes all the second semestral examinations will be allowed to go for Project - I, otherwise, he/she has to discontinue the programme. A student who passes the second semestral examination and completes the Project - I satisfactorily (certified by the guide) is promoted to the third semester of the programme; otherwise, he/she has to discontinue the programme. A student promoted to the third semester of the programme will be allowed to attend the fourth semester of the programme if he/she passes the third semestral examinations. A student who submits his/her dissertation and project reports within the prescribed time limit and passes the fourth semestral examinations will be declared to have successfully completed the fourth semester of the programme. If a student fails in the

course work, he/she will be allowed to appear at backpaper examinations. At the most one backpaper examination is allowed in a given course. A student can take a maximum of 2 (two) backpaper examinations in any of the four semesters of the programme subject to a ceiling of a maximum of 2 (two) in the first year and 2 (two) in the second year. However, there will be no backpaper examinations for Dissertation, Project - I and Project - II.

A student passing the M. Tech. (QROR) degree examination is placed either in the First Division with Distinction, or First Division or Second Division depending on his/her performance.

Details of all relevant aspects of this programme are given in the Students' Brochure for M.Tech. (QROR).

7.9 Part-time Course in Statistical Quality Control

(This course will be notified separately.)

7.9.1 Scope

This course is intended to provide intensive training in the theory and practice of SQC. Emphasis is on equipping the students with the basic practical skills in SQC approach with sufficient theory to understand the principles involved, and to develop in them the power of systematic thinking, practical approach and exposition. The course is offered at Bangalore and Hyderabad Centres. But it is not offered at a centre in a session unless at least 10 selected candidates are enrolled for it.

7.9.2 Duration

The course is held twice a year and extends over a period of 6 months : January-June and July-December. Classes are usually held on five days a week in two sessions of one hour duration each commencing at 1800 hours.

7.9.3 Eligibility

Admission is restricted to persons working in industrial, commercial or scientific organizations and sponsored by their organizations. Minimum educational qualifications are any one of the following :

- (i) Diploma in any branch of Engineering or Technology from a recognized Institution;
- (ii) Bachelor's degree (with Mathematics at the pre-university or equivalent level) from a recognized university or institution.

Candidates should normally be under 35 years of age. Candidates should possess a minimum of one year's working experience in an industrial, commercial or scientific organization. The sponsoring organizations must ensure

- (i) that their candidates will attend at least 75% of the classes,
- (ii) adequate opportunities for the candidates to carry out the project work on some problem of interest to them,
- (iii) facilities - such as transport - to the SQC and OR Unit for supervising the project work.

7.9.4 Course Structure

The course comprises lectures, practical exercises, assigned reading, home tasks, tutorials, seminars, group discussions and project studies on Statistical Methods and SQC Techniques. Project work runs concurrently outside the class hours in the candidate's own organization.

A fee of Rs. 1500/- is charged.

The course is now under review.

7.10 Intensive Course in Programming and Application of Electronic Computers

(This course will be notified separately, if offered.)

7.10.1 Scope

The objective of this course is to impart a thorough knowledge of systems and programming work in connection with the use of electronic digital computers. It is a full-time course comprising lectures, demonstrations, directed reading and practical assignments. The training is of a general nature and not restricted to the particular system of machines available in the Institute. The course is offered in Kolkata, subject to availability of facilities.

7.10.2 Duration and Class Hours

The duration of the course is 10 weeks. Classes are ordinarily held during the day between 1000 and 1700 hours. Depending on availability of the computer system, practical classes may be held at any time between 0700 and 2200 hours. The course is usually conducted during October-December.

7.10.3 Eligibility

Persons with good academic record, preferably with knowledge of mathematics up to the graduate level, and currently engaged in research and/or related activities are eligible for admission to the course.

7.10.4 Course Structure

The course covers Fundamentals of Digital Electronic Computers, Conventional Computing Equipment and Programming in a High Level Language. The course structure is under review.

A course fee of Rs. 1500/- is charged.

7.11 Junior/Senior Research Fellowship (JRF/SRF)

7.11.1 Research Fellowships in Statistics, Mathematics, Quantitative Economics, Computer Science, and Quality, Reliability & Operations Research (QROR).

7.11.1.1 Scope

The Institute offers Junior Research Fellowships to candidates in Statistics, Mathematics, Quantitative Economics, Computer Science, and Quality, Reliability &

Operations Research (QROR). A candidate admitted as a Junior Research Fellow is expected to take research courses and also engage in original research-work in one of the above areas under the guidance of a supervisor appointed by the Institute, culminating in a doctoral thesis to be submitted for the Ph.D. degree of the Institute. Candidates making satisfactory progress towards the above goal are eligible to register for the Ph.D. degree of the Indian Statistical Institute. At the end of the second year, the Junior Research Fellows are assessed for the award of Senior Research Fellowships. The total duration of Junior and Senior Research Fellowships shall not **exceed 5 years**.

A Special Research Fellowship of Rs. 15000 per month (JRF-level)/ Rs. 18000 per month (SRF-level) is also available for outstanding candidates in each of the following subjects: (i) Statistics, (ii) Mathematics, (iii) Computer Science, (iv) Quantitative Economics and (v) Quality, Reliability & Operations Research.

7.11.1.2 Centre

The names of the centres along with the respective subjects in which junior/senior research fellowships are being offered this year are given below.

Centre	Subject
Kolkata	Statistics, Mathematics, Quantitative Economics, Computer Science, and Quality, Reliability & Operations Research (QROR)
Delhi	Statistics, Mathematics, Quantitative Economics, and Quality, Reliability & Operations Research (QROR)
Bangalore	Statistics , Mathematics and Computer Science
Chennai	Quality, Reliability & Operations Research (QROR)
Hyderabad	Quality, Reliability & Operations Research (QROR)

7.11.1.3 Eligibility for admission to the JRF programme

Statistics : (i) A good academic record with M.Stat., M.A./M.Sc. or equivalent degree in Statistics or, (ii) outstanding mathematical maturity with B.Stat./B.Math., B.A./B.Sc. or equivalent degree with Statistics as the main subject.

Mathematics : (i) A good academic record with M.Stat., M.Math., M.A./M.Sc. or equivalent degree in Mathematics or, (ii) outstanding mathematical maturity with B.Stat./B.Math., B.A./B.Sc. or equivalent degree with Mathematics as the main subject.

Quantitative Economics : (i) A good academic record with M.S.(QE), M.Stat., M.A./M.Sc. or equivalent degree in Statistics/ Mathematics/ Economics/ Econometrics or, (ii) outstanding mathematical maturity with B.A./B.Sc. degree with Economics as the main subject. A candidate possessing a Master's degree in any subject with Mathematics/Statistics at B.A./B.Sc. (Pass) level will also be eligible.

Computer Science : A good academic record with M.E./ M.Tech. or equivalent degree in Electronics/ Telecommunication/ Radio Physics/ Computer Science/ Electrical Engineering/ Microwave Communications/ Information Technology/Bioinformatics/Biotechnology with Mathematics as a compulsory subject or a good academic record with M.Sc./ M.C.A./ M.A. or equivalent degree in Physics/ Mathematics/ Applied Mathematics / Statistics / Electronic Sciences / Computer Science / Atmospheric Science / Information Technology/ Bioinformatics/Biotechnology with Mathematics as a compulsory subject at the graduate level. Outstanding candidates having B.E./ B.Tech. or equivalent degree in the above subjects will also be eligible.

Quality, Reliability & Operations Research (QROR). : A good academic record with M.Tech. / M.E. / M.S. / M.Phil. or equivalent degree in Quality / Reliability / Operations Research or a good academic record with M.Stat. / M.Sc. / M.A. or equivalent degree in Mathematics / Statistics / Physics with Mathematics as a compulsory subject at the graduate level. Outstanding candidates having B.E. / B.Tech. or equivalent degree in the above subjects will also be eligible.

7.11.1.4 Selection Procedure

Subject to satisfying the eligibility criteria, the selection of candidates for JRF is strictly based on merit as judged by academic record, performance in selection tests and interviews.

Note : The candidates who have been awarded research fellowship by CSIR/NBHM can seek an interview any time of the year and, on the basis of performance in the interview, they are admitted as CSIR/NBHM fellows working at ISI.

7.11.1.5 Current Research Interests in Statistics, Mathematics, Quantitative Economics , Computer Science, and Quality, Reliability & Operations Research (QROR) at Different Centres

Kolkata

Statistics : Asymptotic Theory in Statistics, Large Deviations, Decision Theory, Statistical Inference : parametric, non-parametric and semi-parametric, Bayesian Analysis, Model Selection, Resampling Plans, Sequential Analysis, Sequential Plan, Multivariate Analysis, Parametric/Non-parametric Regression Analysis, Robustness, Discrete and Categorical Data Analysis, Linear Models, Parametric/Nonparametric Discriminant Analysis, Biostatistics, Environmental Data Analysis, Survival Analysis,

Reliability, Directional Data Analysis, Growth Curve Modelling, Exploratory Data Analysis, Ranking and Selection, Large Dimensional Random Matrices, Extreme Value Theory, Constructional and Combinatorial Aspects of Designs, Optimal Designs, Sampling Theory and Surveys. Stochastic Processes, Inference in High Dimensional Models. Applications of Statistics in Geology, Molecular Biology, Human Genetics, Social Sciences and Industrial (Quality) Engineering; GIS Applications, Statistical Computation, Cryptology, Statistical Pattern Recognition, Image Analysis, HIV/AIDS Modelling. Probability Inequality, Clinical Trial, Majorisation, Brain Mapping.

Mathematics : Functional Analysis, Geometry of Banach Spaces, Algebraic and Differential Topology, Symplectic Topology, Transformation Groups, Harmonic Analysis, Commutative Algebra: Affine fibrations, projective modules and allied areas, Combinatorics, Graph Theory and Applications to Social Sciences, Mathematical Logic, Set Theory and Descriptive Set Theory, Spectral Theory of Differential Operators, Noncommutative Geometry, Complex Algebraic Geometry, Stochastic Calculus, Financial Mathematics, Markov Chains, Diffusion, Random Matrices, Limit Theorems, Stochastic Approximations, Cryptology, Large Dimensional Random Matrices, Extreme Value Theory.

Quantitative Economics : Microeconomics, Macroeconomics, International Trade, Development Economics, Welfare Economics, Game Theory, Voting Theory, Contract Theory, Industrial Organization, Financial Economics, Finance, Convergence, Social Choice and Political Economy, Public Economics, Economic Growth, Indian Economic Problems, Agricultural Economics, Environmental Economics, Time Series Econometrics, Financial Econometrics, Empirical/Applied Econometrics, Poverty and Inequality.

Computer Science : Computer Networks, Sensor Networks, Wireless Sensor Networks, Parallel/Distributed Architectures and Algorithms, Mobile Computing, Parallel and Distributed Computing, Cluster Computing, VLSI Design and Testing, Algorithmic CAD for VLSI, Computational Geometry, Computational Biology, Fault Tolerance, Graph Theory, Algorithms and Computational Complexity, Programming Languages and Methodology, Nanotechnology and Gigascale Integration, Biochips, Nano-biosystems, IPprotection, Powerware Architecture. Pattern Recognition, Machine Learning, Image and Video Processing, Computer Vision, Artificial Intelligence, Natural Language Processing, Data Mining, Web Intelligence and Web Mining, Text Mining, Information Retrieval, Speech and Signal Processing, Biomedical Image Processing, Soft Computing, Fuzzy Sets and Systems, Computational Linguistics, Uncertainty Analysis, Fuzzy Control, Artificial Neural Nets, Rough Sets, Neurofuzzy and Hybrid Systems, Atmospheric Science, Remote Sensing, Digital Document Processing, Graphics Recognition, Content-based Image Retrieval, Mathematical Morphology, Fractals, Wavelets, Genetic Algorithms, Evolutionary Computing, DNA - Computing, Chaos, Artificial Immune System, Neurodynamics, Case Based Reasoning, Digital Watermarking, Cryptology, Bioinformatics, Granular Computing. Theory and Applications of Two-dimensional Cellular Automata, Cellular Automata and their Applications, Design and Analysis of Algorithms, Algorithmic Graph Theory and Combinatorial Optimization, Automata and

Formal Languages, Computational Complexity, Coding Theory, Information Theory, Quantum Computing, Logic and Computer Science.

Quality, Reliability & Operations Research (QROR): Analytics of Business Management, Six Sigma and Lean Six Sigma, Mathematical Programming.

Delhi

Statistics and Mathematics : Asymptotic Statistical Theory, Stochastic Processes (theory and applications), Inference in Stochastic Processes, Stochastic Differential Equations, Stochastic Control Theory, Martingale Problems and Markov Processes, White Noise Theory, Nonlinear Filtering, Percolation Theory, Particle Systems and Random Graphs, Superprocesses, Quantum Probability and Irreversible Processes, Statistical Theory of Reliability and Inference, Stochastic Orderings, Nonparametric Inference, Survival Analysis, Design and Analysis of Experiments, Quantum Groups and Noncommutative Geometry, Perturbation of Linear Operators, Matrices and Graphs, Generalized Inverses, Mathematical Finance, Cryptography, and Theoretical Computer Science.

Quantitative Economics : Game Theory and Applications, Behavioral Economics, Voting Theory, Social Choice Theory, Agricultural & Natural Resource Economics, Growth Theory, Political Economy, Economics of Structural Change, Econometrics of Panel Data, Estimation of Discrete Choice Models and Dynamic Programming Models, Theory of Incentives and Public Goods, Finance, Environmental Economics, Economics of the Public Sector, Industrial organization, International Trade Policies, Development Economics, Dynamics of Wealth and Income Distribution.

Quality, Reliability & Operations Research (QROR): Complementarily Problems, and Game Theory.

Bangalore

Statistics and Mathematics : Optimal Designs: Construction and Combinatorial Aspects, Probability Theory on Infinite Dimensional Vector Spaces, Diffusion Processes, Stochastic Calculus, Limit theorems for fractional Brownian and Stable motions, Sample Surveys, Large Sample Theory, Bayesian Inference, Finite series analysis (ARIMA models), Functional Analysis, Geometry of Banach Spaces, Operator Algebras, Operator Theory, Harmonic Analysis on semisimple Lie Groups and the Heisenberg group. Combinatorics, Simple Group Theory, their representations and the associated geometries and the non associative algebras, Differential Geometry, Partial Differential Operators, Probability measures on groups, Algebraic groups, Lowdimensional topology, Geometric group theory, Algebraic geometry and Algebraic Number Theory.

Hyderabad

Quality, Reliability & Operations Research (QROR) : Operations Research and Mathematical Modelling.

Chennai

Quality, Reliability & Operations Research (QROR): Linear Complementarily Problems, and Game Theory,

7.11.2 Junior/Senior Research Fellowships in Other Subjects

7.11.2.1 Scope

The Institute also offers Junior/Senior Research Fellowships in several areas of Natural Sciences and Social Sciences. However, candidates working for Ph.D. in any area other than the five mentioned in Section 7.11.1 need to register with other Universities/Institutes for their Ph.D. A student is initially admitted as a Junior Research Fellow. After two years of satisfactory progress, the Junior Research Fellows are assessed for the award of Senior Research Fellowships. The combined duration of the Junior and Senior Research Fellowships is **five** years. The areas in which the Institute wants to recruit JRFs this year and the respective eligibility conditions for applying for admission are as follows.

(a) **Physics and Applied Mathematics:** Quantum Mechanics, Condensed Matter, High Energy Physics, Quantum Field Theory, Fluid Mechanics.

Eligibility : A good academic record with M.Sc. in Physics/Mathematics/ Statistics.

(b) **Agriculture and Ecology:** Pond Ecosystems, Water Quality, Aquatic Macrophytes, Freshwater Phytoplanktons, Development of Alternative Medicine.

Eligibility : A good academic record with M.Sc. in Botany (with specialization in Plant Physiology / Biochemistry) / Environmental Science/ Microbiology/ Zoology/ Physiology.

(c) **Sociology:** Agricultural and Rural Development, Development Studies, Labour Studies.

Eligibility : A good academic record with M.A./M.Sc. or equivalent degree in Development Studies / Sociology / Economics / Agricultural Economics or any other subject in Social Sciences.

(d) **Psychology:** Cognitive Psychology, Organizational Psychology, Educational Psychology, Personality and Developmental Psychology, Rural Psychology and Mental Health.

Eligibility: A good academic record with M.A./M.Sc. in Psychology/Applied Psychology.

(e) **Geology:** Sedimentology and Geomorphology, Vertebrate Palaeontology, Structural Geology.

Eligibility: A good academic record with M. Sc. in Geology / Applied Geology / Geophysics or equivalent.

(f) **Biological Anthropology :** Health and Nutritional Aspects of Urban Females including Adolescents.

Eligibility: A good academic record with a Bachelor's degree with Anthropology as the Honours/full subject and a Master's degree in Anthropology (with specialization in Physical / Biological Anthropology).

(g) **Library and Information Science**

Eligibility: A consistently good academic record with first or high second class in M. S. (LIS) awarded by the Indian Statistical Institute or Associateship in Documentation and Information Science of the Indian Statistical Institute or NISCAIR/INSDOC or its equivalent degree (such as Master's degree in Library and Information Science from any University)with at least 55% marks in undergraduate programme.

7.11.2.2 Centre

The names of the centres along with the respective subjects in which research fellowships in other subjects are being offered this year are given below.

Centre	Subject
Kolkata	Physics and Applied Mathematics, Agriculture and Ecology, Sociology, Psychology, Geology, and Biological Anthropology.
Bangalore	Library and Information Science

7.11.2.3 Selection Procedure

Subject to satisfying the eligibility criteria, the selection of candidates for JRF is strictly based on merit as judged by academic record, performance in selection tests and interviews.

The candidates who have been awarded fellowship by the CSIR/NBHM can seek an interview any time of the year and, on the basis of performance in the interview, they are admitted as CSIR/NBHM fellows working at ISI.

7.12 Specialist Development Programme (SDP) in Statistical Quality Control and Operations Research

(This course will be notified separately, if offered.)

7.12.1 Scope

The programme is intended to develop professionally competent specialists in Quality Control and Operations Research and to provide careers as successful practitioners in the field through on-the-job training and guided development. The programme is offered at the SQC & OR Units of the Institute in Bangalore, Baroda, Mumbai, Kolkata, Coimbatore, Delhi, Hyderabad, Chennai and Pune.

7.12.2 Duration

The duration of the programme is two years. The programme generally starts in January every year.

7.12.3 Eligibility

Candidates with (a) consistently good academic record with (i) a first class or high second class Master's degree, or equivalent qualification in a relevant subject, or (ii) a good technological degree, and (b) Diploma in SQC & OR of the Indian Statistical Institute or at least one year's specialized post-graduate training in the field of SQC &

OR in Industry with adequate applied work evidenced from certified project reports, are eligible. Both (a) and (b) are essential.

Holders of M.Tech.(QROR) degree of the Indian Statistical Institute may be admitted to the second year of the SDP.

7.12.4 Selection Procedure

All candidates are admitted through a selection test and an interview.

7.12.5 Programme Structure

The participants are given specific field assignments involving consultation, training, applied research etc. including responsibilities for independent projects involving organization and development of QC systems. The programme consists of on-the-job training together with occasional refresher and development courses on various topics of importance to the profession.

7.12.6 Progress Appraisals

The progress of the participants is appraised from time to time both by their immediate supervisors and expert panels. At the end of the first year an annual evaluation and appraisal of the progress is done by expert teams. If the progress is found satisfactory the participant is promoted to the second year, otherwise the fellowship is terminated with immediate effect.

For further details on the programme, the intending candidates should write to the **Head, SQC and OR Unit, Indian Statistical Institute, 203 B.T. Road, Kolkata 700 108.**

7.13 Courses of the International Statistical Education Centre (ISEC)

The International Statistical Education Centre (ISEC) is operated by the Indian Statistical Institute under the auspices of the Government of India. The main purpose of the Centre is to train selected officials, teachers and research workers from countries of the Middle-East, South and South-East Asia and the Far-East and from the Commonwealth countries of Africa. Training is imparted in theoretical statistics and various aspects of applied statistics. A 10-month regular course leading to Statistical Training Diploma is held from June every year. In addition, special courses of varying durations are sometimes organized in a particular field for individuals/small groups of individuals. Facilities are also available for advanced study and research work by senior statisticians from abroad.

The courses are open mainly to Government-sponsored candidates. Further information regarding this course may be obtained from **Member-Secretary, Board of Directors, ISEC, Indian Statistical Institute, 203 B.T. Road, Kolkata 700 108.**

7.14 Central Statistical Organization (CSO) Courses

These courses are organized by the Central Statistical Organization (CSO) of the Government of India, jointly with the Indian Statistical Institute, and are designed to equip statistical officers and probationers of the Indian Statistical Service with advanced statistical methods and to enable them to undertake higher responsibilities in their departments.

Further information regarding the courses may be obtained from **Director General, Central Statistical Organization, Jeevan Prakash Building, 25 Kasturba Gandhi Marg, New Delhi 110 001.**

7.15 Doctoral Awards

7.15.1 Doctor of Philosophy (Ph.D.)

The degree of Doctor of Philosophy is awarded to a candidate for original contribution in a chosen field of research in the areas: Statistics, Mathematics, Quantitative Economics, Computer Science, and Quality, Reliability & Operations Research (QROR) . For this purpose, it is necessary for any candidate to register for this degree under a supervisor and subsequently submit a thesis embodying his/her research work for evaluation by a panel of examiners.

Eligibility for registration as a candidate for the Ph.D. degree : A candidate must satisfy all the three basic eligibility conditions I, II and III listed below in order to be considered for registration for the Ph.D. degree of the Indian Statistical Institute.

- (I) At least one of (a) - (d) given below has to be satisfied.
 - (a) The candidate has successfully completed M.Stat., M.Math.,M.S.(QE), M.Tech.(CS) or M.Tech.(QR&OR) course of the Indian Statistical Institute.
 - (b) The candidate has successfully completed the research programme of the Institute in a subject in which the Institute awards the Ph.D degree either as a regular research fellow of the Institute or as a research fellow in an externally funded project of the Institute. The Research Fellow Advisory Committee (RFAC) of the concerned Unit/Division has to certify that the candidate has successfully completed the research programme.
 - (c) The candidate has a Master's degree from a recognized university and has been a regular worker of the Institute or a project-linked person in an externally funded project of the Institute for at least three years and during this period he/she has been engaged in research in a subject in which the Institute awards the Ph.D. degree. The RFAC of the concerned Unit/Division has to certify that the candidate has been engaged in research for at least three years.
 - (d) The candidate has a Master's degree or a four-year technological degree from a recognized university in a relevant subject and has been formally engaged in full-time research in a recognized research organization for at least three years after the qualifying degree. The candidate should have spent at least one of these three years at the Institute in a maximum of two spells. The association of such a candidate with the Institute for the purpose of satisfying the minimum one-year residence requirement has to be full time and formal, even if it is not on a stipendiary basis.
- (II) Either the candidate has been admitted to the Institute as a research fellow through the selection test cum interview for Junior Research Fellowships conducted annually by the Institute or he/she has successfully passed a written test cum interview conducted by the RFAC of the concerned Unit/Division of the Institute. The test conducted by the concerned RFAC will be at the same level and have the same syllabus as that of the normal JRF selection test in the subject in which ISI's Ph.D. degree is being sought. This condition also applies to candidates who have successfully passed the CSIR, NBHM or similar other tests for junior research fellowship.
- (III) The candidate has sufficient knowledge of the relevant subject and has made substantial progress towards the submission of a thesis as evidenced by research papers published/accepted for publication in journals and/or working paper/preprints and a title and summary of the proposed thesis.

A candidate who has been selected as a junior research fellow of the Institute should apply for registration within five years from the date of selection. The thesis should be submitted within three years of registration.

7.15.2 Doctor of Science (D.Sc.)

This is an award for outstanding published work.

Eligibility : The D.Sc. degree is awarded only in exceptional cases on the basis of outstanding published work. Only those who satisfy one of the following requirements are considered for the award.

- (i) B.Stat.(Hons.)/B.Math.(Hons.) degree or the Statistician's diploma of the Indian Statistical Institute and at least eight years of independent research work in Statistics.
- (ii) M.Stat. degree or Certificate of successful completion of the Two/Three-year Advanced Statistician's Course of the Indian Statistical Institute and at least four years of independent research.
- (iii) Ph.D. degree of the Indian Statistical Institute and at least two years of subsequent research.
- (iv) At least eight years of research work in the field of Statistics after the Bachelor's degree of a recognized university or institute of which at least one year of work must be at the Indian Statistical Institute.

All correspondence regarding registration and other matters connected with Ph.D. and D.Sc. degrees may be addressed to **Convener, Ph.D. - D.Sc. Committee, Indian Statistical Institute, 203 B.T. Road, Kolkata 700 108.**

7.16 Research Associateship

The Institute recruits Research Associates from time to time, for its different Divisions/Units. This depends on the availability of bright post-doctoral fellows having potential for being absorbed as lecturers/assistant professors in the Divisions/Units.

8 Hostel

The Institute has hostels for male and female students in its premises in Kolkata, Delhi and Bangalore. However, it may not be possible to accommodate all degree/diploma students in the hostels. Limited medical facilities are available free of cost at Kolkata, Delhi and Bangalore campuses.

The Institute campus in Kolkata is about 12 km from the city centre; the Bangalore and Delhi campuses are about 20 km from the respective city centres.

9 Placement of Students

Students who have undergone the B.Stat.(Hons.), B.Math.(Hons.), M.Stat., M.Math., M.S.(QE), M.Tech.(CS), M.Tech.(QROR) and other degree, diploma/certificate courses of the Institute and those having the Ph.D. degree of the Institute are now well-placed in government and semi-government departments, public and private sector undertakings, industries and research/educational institutions, both in India and abroad. Most of the students of the Institute get employment offers or admission to some Ph.D. programmes even before they complete the qualifying degree examinations.

There is a Placement Committee in Kolkata, which arranges campus interviews by prospective employers. Campus interviews are also organized at ISI Delhi and Bangalore Centres.

10 INSTRUCTIONS FOR FILLING IN THE APPLICATION FORM

10.1 Applicants are advised to study the prospectus carefully and satisfy themselves that they are eligible for admission to the course/fellowship for which they are applying. If at any stage it is found that a candidate does not satisfy the eligibility conditions or the information furnished in the application is incorrect, the application will be cancelled. Those who have completed or are due to complete the qualifying examinations for which results are not yet published, may also apply for admission; if selected, their admission to a course or fellowship will be provisional pending the announcement of results. In such cases, however, their applications will be cancelled if the final examinations are not completed before **01 July 2010**. This date may be relaxed by the Institute in case of candidates with outstanding academic record and performance in the selection tests and interviews. **If a student had failed in a programme of the Institute and was not allowed to repeat it, he/she is not eligible for re-admission to the same programme.**

10.2 The application form should be filled in carefully and legibly. Instructions given below should be strictly followed.

10.3 Do not write in the space marked "**For office use only**".

10.4 Candidates should affix a copy of their recent stamp size photograph, at the top of the application form at the place indicated. Candidates should sign across the photograph at the bottom after it is affixed, so that a part of the signature appears outside the photograph. Please note that **another identical copy** of the photograph is to be affixed on the Admit Card when you receive it.

10.5 The following relate to specific items in the application form :

10.5.1 Items 1 and 2. Leave one box blank between words. The address to which you want letters to be sent is to be written here in CAPITAL LETTERS along with telephone number, mobile number and e-mail address, if any. **This address should also be written legibly in CAPITAL LETTERS along with telephone number & mobile number, if any, on two (2) envelopes (not less than 10.5" × 5.5") without affixing any stamp and these envelopes are to be sent along with the application form duly filled in. The syllabi, sample questions and the admit card for the selection tests will be sent in these envelopes.**

10.5.2 Item 3. Choose the course (or fellowship) you want to apply for and write the corresponding code (see the table on the next page) in the boxes provided. In case you have successfully cleared the INMO test, put a tick (✓) in the box provided. **Selection tests for the courses/fellowships will be held on the same day.** In view of this, candidates are advised to send **only one application** for the session **2010-2011**.

Candidates selected for Junior Research Fellowships may be asked to join at a place other than the one opted for, if necessary.

Code	Course
BSC	B.Stat.(Hons.) (Kolkata)
BMB	B.Math.(Hons.) (Bangalore)
MSC	M.Stat. (Kolkata)
MMC	M.Math. (Kolkata)
MEC	M.S. in Quantitative Economics (Kolkata)
MED	M.S. in Quantitative Economics (Delhi)
MSL	M.S. in Library and Information Science (Bangalore)
MTC	M. Tech. in Computer Science (Kolkata)
MTQ	M. Tech. in Quality, Reliability and Operations Research (Kolkata)
Junior Research Fellowship for Research Course in	
JSC	Statistics (Kolkata)
JSD	Statistics (Delhi)
JSB	Statistics (Bangalore)
JMC	Mathematics (Kolkata)
JMD	Mathematics (Delhi)
JMB	Mathematics (Bangalore)
JEC	Quantitative Economics (Kolkata)
JED	Quantitative Economics (Delhi)
JCO	Computer Science (Kolkata, Bangalore)
JQR	Quality, Reliability and Operations Research (Kolkata, Delhi, Chennai, Hyderabad)
JLI	Library and Information Science (Bangalore)
JPH	Physics and Applied Mathematics (Kolkata)
JAE	Agriculture and Ecology (Kolkata)
JSO	Sociology (Kolkata)
JPS	Psychology (Kolkata)
JGE	Geology (Kolkata)
JBA	Biological Anthropology (Kolkata)

10.5.3 Item 4. Choose the examination centre where you want to appear for the selection test and write the corresponding code (see the table below) in the boxes provided. Selection tests for admission will be conducted at the centres given in the following table. Candidates should name three centres in their order of preference.

Code	Centre	Code	Centre	Code	Centre
BG	Bangalore	CN	Chennai	NG	Nagpur
BP	Bhopal	DH	Delhi	PT	Patna
BH	Bhubaneswar	GT	Guntur	RN	Ranchi
BD	Burdwan	GH	Guwahati	SM	Sambalpur
CC	Kolkata	HY	Hyderabad	SG	Siliguri
CH	Chandigarh	KH	Kharagpur	TR	Thiruvananthapuram
		LU	Lucknow	VN	Varanasi
		MB	Mumbai	VP	Visakhapatnam

10.5.4 Item 5. Mention your age in years (approximate) & date of birth in the boxes provided.

10.5.5 Items 6 & 7. Choose the alternative which applies to you and put a tick (✓) in the box provided.

10.5.6 Items 8 & 9. Choose the alternative which applies to you and put a tick (✓) in the box provided. Relevant documents (see Section 4, pages 6 and 7 of this prospectus for details) must be produced at the **time of interview**, failing which the candidates will not be considered for admission .

10.5.7 Item 10. Choose the alternative which applies to you and put a tick (✓) in the box provided.

10.5.8 Item 15(a). It is most important to fill in this block accurately and completely. Do not forget to include details about the qualifying examination, which you have completed or are due to complete and for which results are not yet published. If you had Mathematics or Statistics as a full subject of study at any stage, be sure to indicate it in the column marked "Subjects". **Do not send any original documents or copies with the application.**

10.5.9 Item 15 (b). If you are a candidate applying for B.Stat. (Hons.)/ B.Math. (Hons.) and have successfully cleared the **INMO-test** , then write the year of clearing in the space provided.

10.5.10 Item 15 (c). If you are a candidate applying for M.Tech (CS) and have a valid **GATE** score , then write all the required information in the spaces provided.

10.5.11 Item 16. In case you choose to send the downloaded application form (available on our website), please send the Bank Draft along with the filled-in application form, after entering the Bank Draft details in **Item 16** of the application form.

10.6 Submission of application :

10.6.1 Two Self-addressed envelopes (not less than 10.5" × 5.5") are to be enclosed with the application form. The applicant should write *his/her address* legibly in CAPITAL LETTERS **with telephone number & mobile number, if any**, on these envelopes. Postal stamps need not be affixed. The Admit Card, sample questions etc. will be sent in these envelopes.

10.6.2 An Acknowledgement Card is attached with the application form. The applicant should write his/her address legibly on this and affix Rs.6/- stamp on the Acknowledgement Card.

10.6.3 The applicant must send the following documents:

(i) Application form duly filled in.

(ii) **Two Self-addressed envelopes** (not less than 10.5" × 5.5"). **Self- address must be written in CAPITAL LETTERS with telephone number.**

(iii) **Self-addressed Acknowledgement Card affixed with Rs.6/- stamp, OR, One self-addressed Post Card (only if the application form has been downloaded from the website (<http://www.isical.ac.in/~deanweb>)).**

The downloaded application form should be sent along with a Bank Draft of Rs. 450/- (Rs. 225/- only for reserved categories of all programmes except Junior Research Fellowship programme) drawn in favour of Indian Statistical Institute, payable at Kolkata(proper).

The above items should be placed in the **white envelope** and the applicant must submit it personally or send it by registered post with acknowledgement due, to reach the Dean of Studies not later than **Friday, 26 March 2010.**

10.7 Item 14. For M.Tech. in Computer Science, M.Tech. in Quality, Reliability and Operations Research, Part-time Certificate course in SQC* there is a provision for sponsorship of candidates by their employers. **In such cases, Item 14 is to be filled in by the candidate and a separate letter in the format given at the end should be sent by his/her sponsor after consulting the prospectus (see Section 10.13, page 43 of the Prospectus for the format).** PLEASE NOTE THAT FOR THE PART-TIME CERTIFICATE COURSE IN SQC*, SPONSORSHIP IS ESSENTIAL.

10.8 Incomplete or, illegible applications or, those received after the due date, will not be considered.

10.9 Completed applications **must** reach the following address by **26 MARCH 2010**.

**DEAN OF STUDIES
INDIAN STATISTICAL INSTITUTE
203 BARRACKPORE TRUNK ROAD
KOLKATA 700 108.**

10.10 After the application is received by the Institute, the candidate will be allotted a Registration Number and asked to take the selection tests without verification of his/her eligibility. The list of tests to be taken by the candidate as well as the address of the **Admission Test Centre** will be printed on the admit card. In all subsequent correspondence, the applicant should quote the **Registration Number** without which no correspondence will be entertained.

10.11 Candidates who fail to appear at the selection tests will not be considered for admission. On the basis of the performance in the selection tests and past academic records, a limited number of candidates will be asked to appear at an interview for final selection subject to verification of their eligibility with reference to original documents.

10.12 Sample Questions and/or the Syllabi for the Selection Tests, Instructions to the Candidates and the Addresses of the Selection Test Centres are sent to the candidates along with the Admit Card after the applications are processed. The Selection Test is scheduled to be held on **Sunday, 9 May 2010**. ***In case you do not receive the admit card by 23 April 2010***, please inform the Dean of Studies. In the event of your not receiving the Admit Card by the date of the selection test, please proceed to the Admission Test Centre of your first preference, with any communication you have received from us, such as Acknowledgement Card etc. Please take a recent stamp size photograph with you along with your photo identity proof. You may be allowed to write the Admission Tests in case your name appears in the list of candidates sent to the supervisor of the Centre. The addresses of the supervisors and/or the Selection Test Centres are given separately.

*See Section 2

10.13 Format for sponsorship letter :

We sponsor the application for Mr./Ms
for the course. If selected for admission, the applicant will
be available to undergo training for a period of years.
We will abide by the conditions and rules for sponsored candidates mentioned in the
prospectus.

A crossed cheque for Rs.
* in favour of 'Indian Statistical Institute' will be sent positively before the
commencement of the course. Further, for the Part-time Certificate Course in SQC[†],
facilities will also be given in our organization for carrying out project work during
normal working hours under the guidance of the faculty of the Institute.
